## HISPANIC OR LATINO ORIGIN BY SPECIFIC ORIGIN

Universe: Total population

2006-2008 American Community Survey 3-Year Estimates

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

	Delaware	
	Estimate	Margin of Error
Total:	861,804	*****
Not Hispanic or Latino	805,371	*****
Hispanic or Latino:	56,433	*****
Mexican	25,446	+/-2,388
Puerto Rican	17,902	+/-2,202
Cuban	1,218	+/-393
Dominican (Dominican Republic)	949	+/-433
Central American:	4,921	+/-1,076
Costa Rican	217	+/-241
Guatemalan	3,776	+/-1,005
Honduran	307	+/-304
Nicaraguan	218	+/-134
Panamanian	113	+/-78
Salvadoran	290	+/-184
Other Central American	0	+/-151
South American:	3,587	+/-824
Argentinean	463	+/-269
Bolivian	83	+/-102
Chilean	399	+/-284
Colombian	885	+/-377
Ecuadorian	364	+/-259
Paraguayan	71	+/-78
Peruvian	935	+/-520
Uruguayan	0	+/-151
Venezuelan	281	+/-265
Other South American	106	+/-149
Other Hispanic or Latino:	2,410	+/-664
Spaniard	413	+/-199
Spanish	276	+/-184
Spanish American	0	+/-151
All other Hispanic or Latino	1,721	+/-616

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

While the 2008 American Community Survey (ACS) data generally reflect the November 2007 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2008 Puerto Rico Community Survey (PRCS) data generally reflect the November 2007 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
