## HISPANIC OR LATINO ORIGIN BY SPECIFIC ORIGIN

Universe: Total population

2007-2009 American Community Survey 3-Year Estimates

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

	Pennsylvania	
	Estimate	Margin of Error
Total:	12,564,556	*****
Not Hispanic or Latino	11,947,667	+/-160
Hispanic or Latino:	616,889	+/-160
Mexican	105,706	+/-4,497
Puerto Rican	339,222	+/-6,546
Cuban	16,176	+/-1,978
Dominican (Dominican Republic)	48,067	+/-3,423
Central American:	28,392	+/-2,902
Costa Rican	3,343	+/-827
Guatemalan	7,383	+/-1,259
Honduran	3,884	+/-806
Nicaraguan	2,315	+/-764
Panamanian	3,887	+/-956
Salvadoran	7,181	+/-1,457
Other Central American	399	+/-386
South American:	42,154	+/-3,099
Argentinean	2,977	+/-643
Bolivian	746	+/-378
Chilean	2,196	+/-608
Colombian	14,375	+/-1,597
Ecuadorian	10,704	+/-1,797
Paraguayan	374	+/-224
Peruvian	6,059	+/-1,042
Uruguayan	1,150	+/-560
Venezuelan	3,253	+/-1,005
Other South American	320	+/-161
Other Hispanic or Latino:	37,172	+/-2,855
Spaniard	8,078	+/-1,083
Spanish	7,040	+/-1,094
Spanish American	239	+/-108
All other Hispanic or Latino	21,815	+/-2,362

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2007-2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
